Veterans Administration & Medicare

As a person with Veterans Administration benefits, becoming eligible for Medicare brings things to do and choices to make. Let's start with the basics that you need to know;

- You are eligible for Medicare the month that you turn 65.
- If you are already receiving Social Security, you will be automatically enrolled in Medicare. If not, you will need to apply.
- The standard monthly cost for Medicare in 2021 is \$148.50.
- If you do not take Medicare when you're first eligible, you may have to pay a penalty if you enroll later.
- **"The VA does not recommend that veterans cancel or decline coverage in Medicare (or other health care or insurance programs) solely because they are enrolled in VA healthcare."**
Source: VA.GOV

Medicare Benefits For Veterans

Although you already have medical, and possibly other benefits with the VA, having Medicare can expand your benefits and healthcare options. Plus, you've earned your Medicare entitlement.

Some additional benefits that Veterans can enjoy with Medicare are;

- Access to large variety of private doctors, hospitals, and other medical services.
- Reasonable or no out of pocket medical costs.
- Healthcare providers that may be closer and faster to access.
- Second opinions from private doctors. Access to fast emergency or urgent care.
- Prescriptions with more convenient access & potentially lower costs than the VA.
- Dental, vision, hearing aid, and other benefits.

The Parts of Medicare.

Tricare and Medicare

As a retired military service member or their spouse, you probably have Tricare as your medical & prescription coverage. Prior to becoming eligible for Medicare, you have been using this as your main coverage.

Tricare

But, when you become eligible for Medicare at age 65, this changes. When you start Medicare, it becomes your primary medical insurance and Tricare your secondary. Here are some additional facts that you need to know;

- As a Tricare recipient, you must enroll in Medicare to maintain your Tricare benefits.
- If you are already receiving Social Security, you will be automatically enrolled in Medicare. If not, you will need to apply. You can apply for Medicare 3 months before the month that you turn 65.
- Tricare becomes secondary insurance to Medicare and will cover all medical costs not paid by Medicare, essentially giving you 100% coverage (for Medicare A & B services).
- Tricare continues to provide you with prescription coverage and you'll have additional options with Medicare.
- **With Medicare, you have two main choices as to how you are covered.** You can choose to get Medicare directly through the government (Original Medicare) or through private health plans known as Medicare Advantage.
- Tricare can be billed as your secondary insurer for copays with either Original Medicare or private Medicare Advantage.

Suggested next section for Tricare recipients, page 3; The Parts of Medicare.

CHAMPVA & Medicare

As a spouse or dependent of a disabled or deceased military service member, you may be covered by CHAMPVA. When you become eligible for Medicare at age 65, Medicare will be your primary medical insurance and CHAMPVA your secondary. Here are some additional facts that you need to know;

- CHAMPVA covers deductibles & co-pays with Medicare, so you are 100% covered for covered medical services (For A & B).
- You can choose to receive Medicare coverage directly through the government (Original Medicare) or through private health plans known as Medicare Advantage.
- When you start Medicare, CHAMPVA continues to provide you with prescription coverage.
- CHAMPVA can be your secondary insurance and cover copay with either Original Medicare or Private Medicare Advantage.

The Parts Of Medicare

Medicare has 5 parts, with the main ones being Parts A & B. Medicare Part A covers inpatient hospitalization, skilled nursing facility, and home health care. Medicare Part B covers doctors, outpatient treatment and testing.

The Other 3 Parts

- Part C – More commonly known as Medicare Advantage, these are private insurance plans. You have the choice of being covered directly through Medicare or a Private Insurer. Medicare Advantage are a good option for Veterans, Tricare, and CHAMPVA recipients and can provide you with more benefits than traditional Medicare.
- Part D – Medicare prescription pharmacy benefits. Medicare does not provide coverage directly but instead through private insurers.
- Supplements – Medicare Supplements are insurance plans that supplement Medicare A & B. They are offered by private insurers and help cover medical costs. Tricare & CHAMPVA provides the same function, so in most cases, Medicare Supplements aren't needed in these situations.

Medicare Advantage

How To Get The Most Medicare Benefits For The Lowest Cost

With Medicare you have the choice of getting your benefits directly through the government (Original Medicare) or through a private insurer (Medicare Advantage). Both Original Medicare and Medicare Advantage include Part A coverage for hospitalization and Part B for doctors & outpatient care.

Tricare & CHAMPVA can be your secondary insurance to either Original Medicare or Medicare Advantage. Plus, Veterans have access to Medicare Advantage as well. Original Medicare is “one size fits all” and the same for everyone in the country. **Medicare Advantage gives you various choices that may be a better fit for your unique situation. This includes plans that are designed specifically for those with Veterans and Military benefits.**

Medicare Advantage

In addition to choices, the “Advantage” in Medicare Advantage is that they include extra benefits, more than what’s provided with Original Medicare.

These extra benefits vary, depending on the plan, but may include;

- **Dental, Vision, and Hearing Aid** coverage.
- **Silver Sneakers** – Gives you free access to exercise facilities and online exercise videos.
- **Part B Giveback \$** – This is a benefit included with some plans that gives you a monthly dollar amount to help you pay your Medicare cost.
- **Prescription** – There are Medicare Advantage options that include pharmacy coverage and some that do not. You have choices.

Original Medicare Vs. Medicare Advantage

As we've mentioned, you have the choice of Original Medicare (Directly through government) or Medicare Advantage (Private insurance Medicare). To get a better idea of how Medicare Advantage and Original Medicare compare, here is a snapshot comparison of their different features.

Feature	ORIGINAL MEDICARE	MEDICARE ADVANTAGE
<u>Total Monthly Cost Estimate</u>	\$148.50 In 2021	\$98.50 To \$148.50 In 2021

Medicare Supplements

Medicare Supplements are insurance plans that work with Medicare A & B to help cover Medical bills. They should not be confused with Medicare Advantage, which we covered in the previous sections. There are a variety of plans and insurance providers who offer Medicare Supplements.

Tricare and CHAMPVA provide the same function as Medicare Supplements, so for those who have these benefits, Medicare Supplements are unnecessary. For those who only have VA benefits, Medicare Supplements can be beneficial in certain situations. Frequently Asked Questions

When will I start Medicare? If you are turning 65, you are eligible to start Medicare the first day of the month that you turn 65. If you are over 65 and have or are leaving employer insurance; you are eligible to start Medicare anytime. If you are disabled you will typically start Medicare 24 months after being awarded disability. If you have End Stage Renal Disease or ALS, you are usually awarded Medicare immediately.

What costs are associated with Medicare? Medicare has 2 types of costs; Monthly premiums and medical cost sharing. A premium is the cost you pay to have the coverage, typically monthly or quarterly. Cost sharing is what you pay when you have medical care. If you have secondary insurance such as Tricare or CHAMPVA, it can cover your medical cost sharing. These are items such as deductibles and copay's. The standard monthly premium most people pay in 2021 is \$148.50. There are ways to lower your monthly premium such as Part B giveback and state programs.

What is Part B Giveback? Part B Giveback is a benefit of certain Medicare Advantage plans. In these cases, instead of paying an extra cost, the plan gives you money back, which actually lowers your overall cost of Medicare. Part B giveback doesn't lower the quality of your coverage.

When should I apply for Medicare? First, if you are already receiving Social Security payments when you become eligible for Medicare, you don't need to apply. You will be automatically enrolled in Medicare. If you are turning 65 and need to apply, you can do so 3 months before the first day of the month that you turn 65. If you are over age 65 and have insurance through your employer; you can apply anytime and your coverage can begin as soon as the first day of the next month.

How do I enroll in Medicare? 1. Apply Online through the Social Security website. 2. Call the Social Security Administration at 1-800-772-1213 and schedule an appointment to enroll by phone. Instead of calling the main Social Security 800 number, you can call your local office to schedule a phone enrollment.

Do I need to take any action to maintain my VA, Tricare or CHAMPVA? If you have Tricare or CHAMPVA, you will just need to enroll in Medicare A & B. After this, your transition will be automatic. If you have VA benefits you don't need update them when you enroll in Medicare.
